Remar Ugsimar

Full-Stack Developer

Cebu, Philippines | jarinaremar13@gmail.com | remarugsimar.com | Github | Linkedin

Curriculum vitae | October 2026

Full-stack developer based in Cebu, Philippines, building CRM and lead discovery tools, accounting systems, AI-assisted applications, and business websites. Work spans frontend interfaces, backend services, data, and deployment, with freelance experience since 2023.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Joyno Inc.

2026 - Present

Build and maintain production systems including Scout, JoynoSync, Joyno Accounting, and CasaToon. Develop lead discovery, CRM workflows, accounting modules, and AI-powered features across web and mobile applications.

Technologies: Vue.js, Node.js, Express.js, Flutter, Supabase, Firebase, MySQL, OpenAI

Full-Stack Developer Intern | Joyno Inc.

2026 | 6 months

Contributed to internal products and client websites using Vue.js, Node.js, Flutter, and cloud-based backend services. Supported feature development, testing, performance optimization, and production releases across multiple projects.

Technologies: Vue.js, Node.js, Flutter, Supabase, Firebase, Tailwind CSS

Freelance Full-Stack Developer | Independent

2023 - Present

Design and develop responsive business websites for clients including NxOne DC Inc., Get Wrecked Beach & Sports Bar, Casa Amorosa, and Sharks Tail. Deliver customized WordPress builds, SEO improvements, analytics integration, and performance optimization tailored to each client's brand and business goals.

Technologies: WordPress, Elementor, JavaScript, Tailwind CSS, Hostinger, SEO, Analytics

EDUCATION

Cebu Technological University - Barili Campus | 2026

Bachelor of Science in Information Technology | Cum Laude

Bartolome and Manuela Panares Memorial National High School | 2022

General Academic Strand (GAS)

Maghanoy Elementary School | 2016

Elementary education

TECHNICAL SKILLS

Core Technologies: Vue.js, TypeScript, JavaScript, Node.js, Express.js, Flutter, Dart

Database & Backend Services: Supabase, Firebase, MySQL

UI & Styling: Tailwind CSS, HTML5, CSS3

DevOps & Cloud: Hostinger VPS, Cloudflare, Redis, Nginx

CMS & Website Builders: WordPress, Elementor, Wix, Webflow

Tools: Git, GitHub, Vite, Postman, Figma

PRODUCT AND APPLICATION PROJECTS

Scout

CRM with built-in lead discovery | 2026 | Product concept and full-stack development

A lead finder connected to CRM pipelines and funnels, built to move sales teams from manual prospecting to outreach.

- Identified the manual prospecting bottleneck
- Built the lead finder and CRM workflow
- Implemented sales pipelines and funnels

Result: Scout provides a single workflow for discovering businesses, tracking leads, and managing pipeline and funnel activity, built to give the sales team more time for outreach.

Joyno Accounting

Internal accounting platform | 2026 | Full-stack application development

An accounting workspace built around administrative workflows to replace manual work and reduce dependence on recurring subscriptions.

- Translated manual administrative processes into system workflows
- Built the accounting dashboard and financial overview
- Connected financial and administrative modules

Result: Joyno Accounting gives the team an internal workspace for its accounting operations and financial overview, built to reduce manual administration and dependence on an external subscription.

JoynoSync

CRM & sales operations platform | 2026 | Full-stack application development

A shared workspace for leads, pipelines, funnels, call performance, attendance, tasks, and project management.

- Lead, pipeline, and funnel management
- Call performance and attendance tracking
- Task and project management

Result: JoynoSync provides a common workspace for sales tracking and team coordination. Unlike Scout's focus on built-in lead discovery, this project emphasizes visibility across daily sales and team operations.

Technologies: HTML, CSS, JavaScript, Supabase

CasaToon

AI Animation Studio | 2026 | Full-stack product development

An AI-assisted production workspace for organizing story ideas, characters, assets, templates, credits, and video-generation progress.

- AI-assisted creative workflows
- Story and video production tools
- Responsive product dashboard

Result: The resulting product provides a clearer path from idea to production. Complex AI operations are presented as manageable creative steps, with the surrounding application keeping projects, resources, and generation activity organized.

Technologies: Vue, Node.js, Tailwind CSS, AI

WEBSITES AND CLIENT PROJECTS

The Beach Park - Hadsan

Hospitality website | 2026 | Website development

An image-led beach destination website with a focused path to stay dates, guest selection, and booking discovery.

- Destination-focused website presentation
- Clear navigation and booking entry points
- Stay-planning interface

NxOne DC Inc.

Corporate Website | 2026 | Website design and development

A WordPress corporate site explaining NxOne's data-center and AI-infrastructure direction and guiding potential partners to expert contact.

- Responsive corporate presentation
- Service-focused information architecture
- SEO and performance foundations

Technologies: WordPress, Elementor, SEO

Shukey Philippines

Service business website | 2026 | Website development

A service-business website connecting key, lock, shoe, and bag services with a clear path to finding a branch.

- Service-focused website presentation
- Branch discovery and customer contact paths
- Clear navigation across services and business information

Technologies: WordPress

The Shark's Tail

Dive Resort Website | 2026 | Wix website development

Built a responsive website for a Malapascua dive resort, presenting its diving experiences, accommodations, story, and booking information.

- Responsive Wix implementation
- Diving and resort content structure
- Booking and inquiry pathways

Technologies: Wix, Responsive Design, SEO

Roarly Website

Product Website | 2026 | Full-stack website development

Developed a custom website for Roarly with responsive pages, interactive frontend behavior, and database-backed functionality.

- Responsive marketing pages
- Interactive frontend behavior
- MySQL-backed functionality

Technologies: HTML, CSS, JavaScript, MySQL

Joyno Inc.

Corporate BPO Website | 2026 | WordPress website development

Built a corporate website presenting Joyno Inc.'s BPO services, company philosophy, leadership, and Cebu operations.

- Company and service presentation
- Responsive WordPress implementation
- Elementor content management

Technologies: WordPress, Elementor
