Remar Ugsimar

Full-Stack Developer

Cebu, Philippines | jarinaremar13@gmail.com | remarugsimar.com | Github | Linkedin

Resume | October 2026

Full-stack developer based in Cebu, Philippines, building CRM and lead discovery tools, accounting systems, AI-assisted applications, and business websites. Work spans frontend interfaces, backend services, data, and deployment, with freelance experience since 2023.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Joyno Inc.

2026 - Present

- Build and maintain Scout, JoynoSync, Joyno Accounting, and CasaToon across web and mobile workflows.
- Develop lead discovery, CRM pipelines, accounting modules, and AI-assisted product features.
- Work across interfaces, backend services, databases, performance improvements, and production releases.

Full-Stack Developer Intern | Joyno Inc.

2026 | 6 months

- Contributed to internal products and client websites using Vue.js, Node.js, Flutter, and cloud backend services.
- Supported feature implementation, testing, performance optimization, and production releases.

Freelance Full-Stack Developer | Independent

2023 - Present

- Design and develop responsive business websites, including work for NxOne DC Inc. and hospitality clients.
- Deliver custom WordPress builds, SEO foundations, analytics integration, and performance improvements.

EDUCATION

Cebu Technological University - Barili Campus | 2026

Bachelor of Science in Information Technology | Cum Laude

SELECTED PROJECTS

Scout

A lead finder connected to CRM pipelines and funnels, built to move sales teams from manual prospecting to outreach.

Joyno Accounting

An accounting workspace built around administrative workflows to replace manual work and reduce dependence on recurring subscriptions.

JoynoSync

A shared workspace for leads, pipelines, funnels, call performance, attendance, tasks, and project management.

CasaToon

An AI-assisted production workspace for organizing story ideas, characters, assets, templates, credits, and video-generation progress.
